Comments:

As per your voice mail message, Mr. Hanson you are correct in that we have discussed the issue of the sequences listed in the paper listing are not commensurate with the number of sequences of record in the computer readable form (CRF) listing. At each time I have noted the day of the listings in question so you could access your records and note the differences. In order to aid you in resolving this issue, herein are the first pages of the raw sequence listing (03/04/2002) citing on line 10, section iii, enclosed in the box, 30 sequences and the first page of the CRF (02/21/02), section iii, enclosed in the box, 26 sequences. These two citings of sequences are not commensurate, do not match and must match before the issuance of the patent. Also enclosed is the printer rush noting the problem. I hope this tangible evidence aids you in resolving the printer rush expeditiously.

Alana M. Harris, Ph.D.
